Most fires can be put out at their initial stage easily with an extinguisher — potentially saving your business from disaster.

In accordance with OSHA reg 1910.157, annual training is required for employees who may use fire extinguishers at the workplace. Our unique BullsEye Laser or FLAIM™ Virtual Reality systems allow training in any weather, in any location without the mess of traditional fire training methods using the very latest technology to engage students.

Unique training

- Laser driven or virtual reality fire extinguisher training – Train anywhere
- Multi session hands on – Fire extinguisher training for every student
- Training at your facility – Indoor or outdoor, no mess, no clean up
- Environmentally friendly – No chemical discharge or material burn
- Hands on practice

Your employees will learn:

- What causes a fire?
- Identify classes of fires and fire extinguishers
- Fire extinguisher operation
- PASS method
- When to fight a fire and when to escape
- Workplace fire safety

Portable Fire Extinguisher Services

Portable Fire Extinguisher Inspections, Service and Repair

How are you currently conducting your monthly and annual required portable fire extinguisher inspections and services? Let UniFirst First Aid + Safety handle monthly and annual inspections and take care of all your portable fire extinguisher service and repair needs.

It's as easy as 1, 2, 3

1. UniFirst First Aid + Safety Fire Safety Specialist will visit your location and conduct your monthly or annual inspections per NFPA requirements and guidelines.
2. Any required portable fire extinguisher service will be conducted to help you maintain compliance.
3. You will be provided with a written, detailed report of the inspection and any service or repair work performed.

NFPA 10 Standard

✓ Monthly Inspections ✓ 12-Month Recordkeeping ✓ Required Maintenance

Emergency + Exit Lighting Services

Emergency and Exit Lighting Inspections, Service and Repair

Just like our fire extinguisher inspection services, UniFirst First Aid + Safety can take care of the required monthly and annual inspections of your Emergency and Exit Lighting, along with all of your repair needs, using the same 3 step process.

1. UniFirst First Aid + Safety Fire Safety Specialist will visit your location and conduct your monthly or annual inspections per NFPA requirements and guidelines.
2. Any required emergency and exit lighting service will be conducted to help you maintain compliance.
3. You will be provided with a written, detailed report of the inspections and any service or repair work performed.

Helping you meet NFPA 101 Standards

Each month, your UniFirst First Aid + Safety specialist will inspect and run a 30-second test of your emergency lights and exit signs. The annual NFPA101 inspection also includes a 90-minute battery backup test. This required monthly and annual testing program includes the documentation needed for insurers and local fire departments.

Let UniFirst First Aid + Safety help make your workplace safer.
