Onsite Audiometric Testing Services

UniFirst has partnered with Soundtrace to offer a fully integrated, OSHA-aligned hearing conservation system that combines AI-powered software, precision hardware, and predictive analytics to protect your teams and ensure long-term compliance.

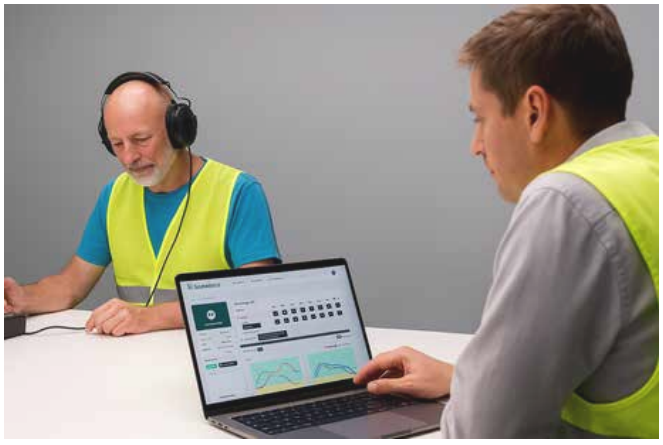

- ✓ Convenient onsite, ***booth-less*** audiometric testing
- ✓ Automated record keeping for OSHA-compliance
- ✓ AI predictive hearing decline insights
- ✓ Easy to read dashboards and audit-ready records
- ✓ Quality assured, expert-backed audiology

Streamline your hearing testing by eliminating common scheduling conflicts, enabling convenient coordination across multiple shifts and compatibility with tight production schedules. You'll receive improved testing procedures, maintain productivity with minimal downtime.

OSHA Compliance Made Easy and Cost-Effective

UniFirst's First Aid & Safety team will offer white glove, on-site audiometric testing services to their customers. Key benefits include:

Convenience
Testing happens on-site in 5 to 7 minutes per employee.

Early Detection
AI detects shifts before they become permanent.

Improved Program Spend
Eliminate hidden or unexpected costs from mobile van testing.

Testing + First Aid + Safety + Fire Protection + Safety Training
